DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 10-21-03 has been considered.

Claim Objections

2. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented. There are two claims numbered as claim 17: one on page 25 and one on page 26. Claims 18-19 are object to for depending on claim 17.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 26 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Claim 26 recites the limitations "the first voltage reference circuit" in line 2, "the first offset data" in line 3, "the second voltage reference circuit" in line 10, and "the second offset data" in lines 11-12. There are insufficient antecedent bases for these limitations in the claim.

Allowable Subject Matter

6. Claims 1-16, 20-25, 27-31 are allowed.

7. Claim 26 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
8. Claims 17-19 are objected to as set forth in the Claim Objections paragraph.
9. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach or suggest a magnetic memory comprising: a sense amplifier; and a calibration system configured to monitor at least one operating parameter of the magnetic memory and calibrate the sense amplifier if a measured parameter corresponding to the at least one operating parameter is within a range.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references cited in form PTO-892 disclose compensation circuits for change in a measured parameter in a memory device.
